

## About Me: Ben Enos

**Major:** Economics & Political Science

**Career:** My goal is to go into lobbying after I graduate. I plan to try and gather as much experience in politics and economics as I can while in college to better prepare myself for this career.

**Technical Experience:** Most of my experience with technology comes from my IS 101 class I took last year. I am decently proficient in Excel. Overall, I would say that I have an intermediate understanding of technology. I mostly stick to Microsoft Word for my writing and Excel for my data entry. I primarily use technology for my academic work, although I have recently begun incorporating its use into my position of Chaplain within my fraternity.

**About Me:** I was born and raised in Reno Nevada, I enjoy swimming, hiking, and going out with my friends. I coach swim in my free time, and when I am not busy with classes, I often spend a lot of time at my fraternity house, ATO. I like country and jazz music, but I would say I often listen to podcasts instead of music when I am driving.
